Impact Drill

The impact drill with its legally protected dust extraction device sets new standards.

The necessary low-pressure for extraction of the drill dust is produced by a separate suction cup. Thus the full motor power is available for drilling – Drill dust has no chance.

If the exhaust is not needed, a drill bit depot can be placed in the additional handle.

The cable clip prevents a rolling up of the cable after finished work.

Features

- Legally protected dust extractor (by separate suction cup)
- Additional handle with soft grip and drill bit depot
